Essentials

CLIMATE

Kaua'i's weather is ideal year-round, with daytime temperatures ranging from the mid-70s to mid-80s Fahrenheit and northeast trade winds providing a refreshing breeze. Rain showers fall predominantly over the mountain ranges. The ocean temperature is 68 degrees to 75 degrees.

TRANSPORTATION

A 25-minute flight from Honolulu, Kaua'i is regularly serviced by more than 20 daily flights into Līhu'e Airport (LIH), with nonstop service from key North American carriers and cities. Ground transportation includes hotel shuttles, taxi cabs, limousines, rental car companies and rideshare services. Several tour companies provide guided tours aboard motor coaches, mini-buses, vans and luxury sedans.

SHORT-TERM RENTALS

Illegal short-term rentals are a community concern. We ask visitors to be sensitive to our residential communities and ask rental hosts for the property's TVNC (Transient Vacation Non-Conforming) number to make sure it is operating legally. This ensures that the property is located within a designated area and protects visitors from falling victim to illegal operations.

Princeville

Welcome

When you close your eyes and picture tropical paradise, the place you imagine is probably very much like Kaua'i. Incredible beaches are here for you, of course, but also emerald valleys, verdant rainforests, awe-inspiring cliffs and mountain spires. Add to all this the *aloha* spirit and a rich culture. The Garden Island is a dream come true.

FACTS ABOUT KAUA'I

Kaua'i is famous for its diverse and scenic wonders, such as the 3,567-foot deep Waimea Canyon, which stretches 14 miles across the western end of the island — as well as the 3,000-foot high mountain cliffs that rise from the ocean floor to the magnificent, unspoiled Nāpali Coast. A number of qualities make Kaua'i unique:

- No structure can be built more than four stories high, the height of a mature coconut palm tree.
- Kaua'i has been the location for many popular movies, including *South Pacific*, *Blue Hawaii*, *Raiders of the Lost Ark*, *Jurassic Park*, *Tropic Thunder*, *Pirates of the Caribbean: On Stranger Tides*, *The Descendants*, *Jurassic World*, *Hobbs & Shaw* and *Disney's Jungle Cruise*.
- Kaua'i is home to three of the top 15 golf courses in Hawai'i.
- 62% of Hawai'i's taro production is grown on 200 acres in the North Shore community of Hanalei.
- The National Tropical Botanical Garden is headquartered on Kaua'i. Its goal is to advance scientific research, public education and plant conservation.

History & Culture

Geologically, Kaua'i is the oldest of the six main Hawaiian islands. Kaua'i's distant past is filled with legends — the most well-known tells of the Menehune, a mythical group of small people talented in construction and engineering, who created Kaua'i's aqueducts and fishponds, often in a single night.

Kaua'i was introduced to the Western world by Captain James Cook after he landed in Waimea Bay in 1778. During this era of Western discovery, King Kamehameha I was attempting to unify all the Hawaiian Islands under his rule. Kaua'i and Ni'ihau

(a small, neighboring island) were the only islands to deter his efforts. Later, Kaua'i's reigning king, King Kaumuali'i, united peacefully with King Kamehameha I in 1810.

Today, Kaua'i's fertile soil provides excellent conditions for *kalo* (taro) cultivation. When pounded, the plant's edible roots create *poi*, a staple in the diet of the native population. You can find verdant fields of green, heart-shaped *kalo* leaves in plantations scattered across the island.
